Spectra Mobile Storage Carts

The Spectra range is a cart system that combines mobility and drawer flexibility into a lightweight colour coded package which has applications throughout all healthcare environments.

The unique drawer system is based on removable 60 x 40 tray systems that offer different depths and the option of integrated drawer dividers. This allows flexibility with the carts applications, particularly in the ability to restock the carts with transfer tray systems.

The carts shelves are one piece moulded polymer which are easy to clean and eliminate infection control issues due to the rounded internal mould design, whilst integrating a raised lip 3 side to prevent items falling off.

The Spectra range offers unlimited drawer configurations and a range of colourful drawer fronts.

RTS Swivelling Telescopic Arm

ParagonCare

You won't trip over anything hanging on the wall. This is the best reason for the use of telescopic arms, the screening system which is only there when it is needed. Following use of the screen, simply push together and turn toward the wall. Your room is then restored to its usual appearance.

The RTS Telescopic Arm comes in 3 different lengths and 3 great colours. Please indicate your preferred colour when ordering.
