# Why Cardinal Health™ Surgical Gloves?

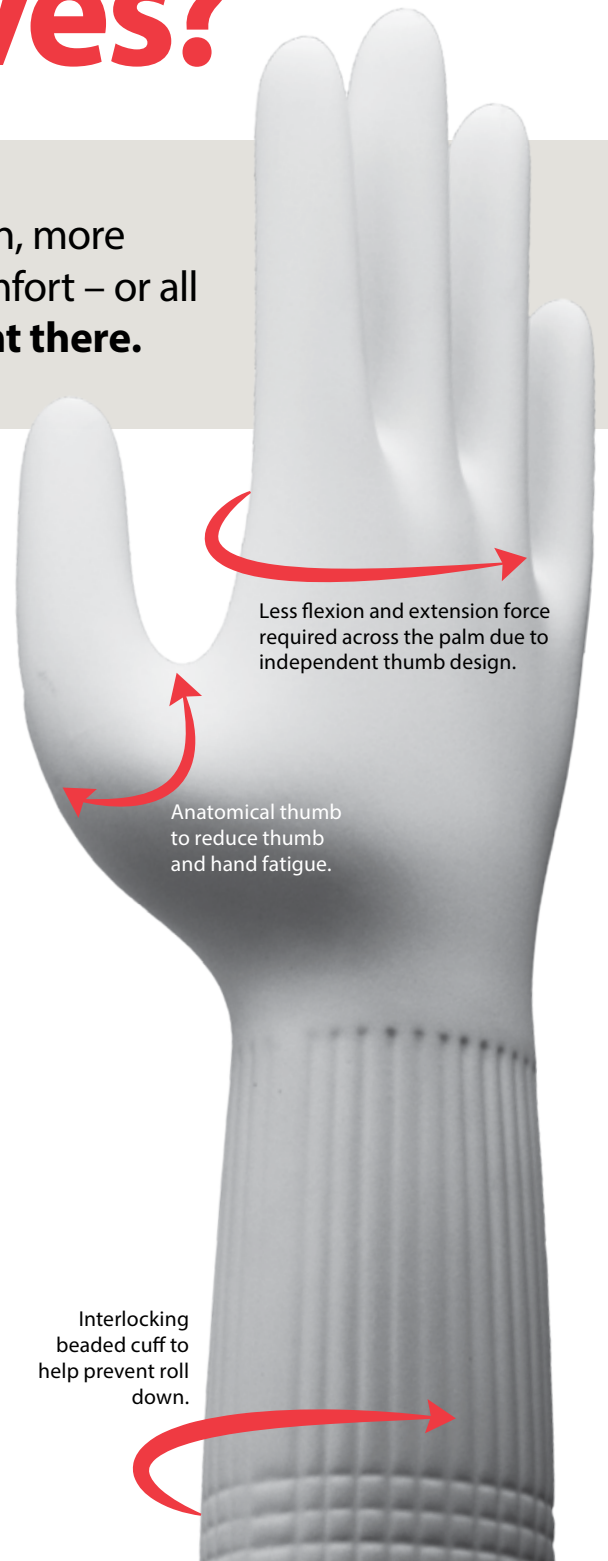

Whether you're looking for protection, more sensitivity, better control, greater comfort – or all four – **you'll find the perfect fit right there.**

## A mold unlike any other.

**There are important differences in surgical glove manufacturing and technology that can impact the way a glove feels and performs. We believe that the surgical glove mold used makes all the difference in the fit and feel of the glove.**

The Cardinal Health™ Surgical Gloves mold features an independent thumb design – meaning the finger placement replicates the anatomical position of a resting hand – allowing for natural comfortable movement.

No matter what type of surgery you are in, surgical gloves produced on a mold with an independent thumb design ultimately can help reduce hand fatigue so you can perform at your best.

## Protexis® PI Latex-Free Powder-free Surgical Gloves

Protexis PI Synthetic Surgical Gloves fit, feel and perform so much like latex gloves that you'll have a hard time believing they are not. That's because the molecular structure of Protexis PI polyisoprene synthetic rubber is nearly identical to natural rubber latex. The only difference is that the natural rubber latex proteins and allergens have been eliminated and, with that, the worry of latex allergies.

- Unique polyisoprene formulation and proprietary manufacturing technology provide fit, feel and performance comparable to natural rubber latex
- Eliminate concerns regarding glove-related natural rubber latex proteins and allergens
- Eliminate risk of glove-related Type I reactions in patients and healthcare workers

# ONE GIANT LEAP FOR HAND KIND

THE GAMMEX® PI HYBRID GLOVE. REDEFINING THE FUTURE.

**GAMMEX®**

## PI COMFORT NOW MEETS STRENGTH

Featuring Ansell's patent-pending HYBRID™ Technology, new GAMMEX® PI Hybrid surgical gloves combine the best of two synthetic materials, delivering the latex-like comfort and sensitivity of PI while also displaying the higher strength and durability associated with neoprene. This DPG- and Zinc 2-mercaptobenzothiazole-free (ZMBT-free) glove is semi-transparent for more effective breach detection, and is an ideal outer glove within a double gloving system.

Contact your Ansell representative or visit [ansell.com/hybrid](https://ansell.com/hybrid) for more information.

## GloveOn Victor PI Surgical Gloves

Our GloveOn Victor PI Surgical Outer Glove provides surgeons with a fine touch for surgical procedures requiring a high tactile response. Combined with great dexterity, comfort and feel, GloveOn Victor PI allows you to concentrate fully on the job at hand. Best used when worn in conjunction with GloveOn Victor PI Under Glove for a complete double gloving solution that also aids in puncture detection.

- MBT and DPG Free
- Powder Free
- Textured
- Curved fingers
- Sterilised using gamma irradiation
- White colour

## GloveOn Victor PI Underglove Surgical Gloves

Designed to alert you of a puncture when partnered with GloveOn Victor PI Outer Glove, our polyisoprene surgical under glove provides the ultimate protection for surgeons. Its blue colour has been specially selected to ensure that any punctures in the outer glove are detected quickly and clearly. Recommended for use in all surgical procedures that need good grip and dexterity whilst double gloving.

# DO THE MASK STANDARDS LEAVE YOU EXPOSED?

## AS 4381:2015 IS THE NEW STANDARD FOR SINGLE-USE FACE MASKS

- Masks are now rated into three levels of protection: Level 1, Level 2 and Level 3
- Masks are required to meet minimum fluid resistance: 80, 120 and 160mm Hg
- The standard suggests mask protection levels for procedures and departments

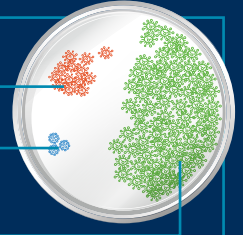

## HALYARD, YOUR PARTNER IN COMPLIANCE

- ✓ All HALYARD\* FLUIDSHIELD\* Masks meet the new Australian Standard AS 4381:2015
- ✓ FLUIDSHIELD\* Masks are available in Level 1, Level 2 and Level 3
- ✓ The level of protection is clearly labelled on the mask nose piece and on the box, so you and your staff can easily identify the right mask for each task

As little as **1 millilitre of blood** can contain **virus counts** ranging from:<sup>1</sup>

**HEPATITIS C**  
1 Million  
**HIV**  
10–1,000  
**HEPATITIS B**  
1 Million–10 Trillion
