

INTELLIGENT PUBLIC ACCESS DEFIBRILLATOR

iPAD CU-SP1

CPR DETECTION

CPR is vital to ensure that the casualty has the best chances of survival. The iPAD CU-SP1 detects if CPR is being performed and when appropriate prompts and encourages the first responder. If CPR is not being performed, the iPAD CU-SP1 prompts the first responder to 'perform CPR'. If CPR is already being performed, the iPAD CU-SP1 encourages the first responder by prompting them to 'continue CPR'.

SMART PADS - SMART STORAGE!

The pre-connected 'Smart' electrode pads are stored in a clear storage compartment on the underside of the unit. This ensures that the iPAD SP1 is always ready to be used in the shortest amount of time possible. The unique technology built in to the iPAD CU-SP1 and the 'Smart' electrode pads allows the unit to detect, when connected, if a set of pads has already been used. If they have, the user is advised of this. In addition, the visual indicator on the front of the iPAD CU-SP1 indicates if the connected pads are within their life expectancy. The indicator will change when the pads have only 3 months life left before their expiry date-giving you plenty of time to arrange for replacements. The indicator will change again when the expiry date is reached. Checking the life of your pads is as quick and simple as looking at the LCD display.

AUTO VOLUME ADJUST

Public places can often be noisy. Crowded stations, airports with constant announcements and streets filled with cars and people often make it difficult to hear what's going on around you. Trying to use an AED in noisy places can be difficult if the first responder can't clearly hear the voice prompts and instructions from the AED.

The iPAD CU-SP1 listens to the ambient noise, and automatically adjusts the volume of its prompts to make them clear and easily heard over the background noise. When the correct volume has been reached the iPAD CU-SP1 keeps the prompts at this level.

PATIENT MODE SWITCH

- Easily switch from Adult to Child mode without changing pads.
- Safety cover prevents accidental switching

IPAD CU-SP1

Automatic External Defibrillator

- Charging time: Less than 10 secs
- Charging time after CPR: 6 secs
- Output Energy Adult-150Joules /pediatric-50Joules
- CPR guidance – voice prompts for adult and child patient
- On/Off button & Shock button
- Indicator LCD display
- Automatic volume adjusting
- Status display: Device, battery Pads, sensing Pads expiring date, Pads connection status and CPR monitoring
- Patient analysis shockable rhythms – Ventricular Fibrillation, Ventricular Tachycardia
- Multi recording and storage capacity
- Includes: Defibrillator, Pads, Battery, Manual
- Wall cabinet and bracket options available

Defibtech Lifeline Defibrillator

Defibtech's breakthrough design makes it possible for every budget to afford a life-saving AED

- The original award winning Defibtech AED
- Longest battery life on the market – 7 years
- Available in Semi-automatic & Fully-automatic models
- Simple to use – First responder to untrained bystanders
- High ratings for water and dust protection – IP54
- Manufactured in the USA
- Free software upgrades throughout 8 year warranty
- Daily automatic self-tests
- Free online training
- Lightweight and durable

DCF-E110	Semi- Automatic	\$1,995
DCF-E130	Fully-Automatic	\$1,995
DCF-E210	Replacement Battery	\$475

Defibtech Lifeline VIEW Defibrillator

- Award winning design
- Simple to use – First responder to untrained bystanders
- High ratings for water and dust protection – IP55
- Manufactured in the USA
- Charge time less than 4 seconds
- Free software upgrades throughout 8 year warranty
- Daily automatic self-tests
- Full colour interactive display showing step-by step instructions for performing CPR and external defibrillation
- Free online training
- Compact and lightweight – 1.4kg
- Long battery life with 125 shocks or 8 hours of continuous operation

Semi-Automatic

\$2,595

DCF-2003

Defibtech Lifeline PRO Defibrillator

Designed for the Professional

- Three operating modes available – AED, ECG monitoring and manual override
- High ratings for water and dust protection – IP55
- Manufactured in the USA
- Charge time less than 4 seconds
- Free software upgrades throughout 8 year warranty
- Daily automatic self-tests
- Full colour interactive display, ECG display, shock control, step-by step instructions for performing CPR and external defibrillation
- Compact and lightweight – 1.4kg
- Free online training
- Long battery life with 125 shocks or 8 hours of continuous operation
- Rechargeable battery available
