## + Your partner in pressure injuries

We've got you covered with our comprehensive line up of products to help you follow the latest international clinical practice guidelines.

Helping you get **CLOSER TO ZERO**° pressure injuries.

ALLEVYN<sup>◇</sup> LIFE  
Foam Dressings

## ALLEVYN<sup>®</sup> LIFE

Smith+Nephew

High levels of exudate and pressure injury prevention

ALLEVYN<sup>®</sup> LIFE has been developed in response to patient and customer research that highlighted concerns with regards to living with a wound. ALLEVYN<sup>®</sup> LIFE provides a number of features and benefits, many which are first for the foam category, and all designed with the goal of improving outcomes and assisting with challenging healthcare budgets.

- The unique quadrilobe shape and wide border is designed to fit the contours of the human body
- The masking layer minimises the visual impact of exudate
- Excellent fluid locking under pressure
- Peace of mind leakage prevention
- Multi-layered design provides cushioning
- Bump guard layer cushions against any trauma
- Helpful change indicator avoids unnecessary dressing changes
- Minimises waste
- Increases dressing wear time
- Reduces pain on removal
- Patient wellbeing

## ALLEVYN<sup>®</sup> Gentle Border Multisite

Smith+Nephew

Moderate levels of exudate

- Designed especially for the human body shape
- With it's unique tri-lobe design, is ideal for dressing awkward areas of the body
- Perforations in the film help aid with positioning and security of the dressing
- All the benefits of ALLEVYN<sup>®</sup> Gentle Border Triple Action Technology plus ideal for use in fragile skin

## ALLEVYN<sup>®</sup> Adhesive

Moderate levels of exudate

ALLEVYN<sup>®</sup> Adhesive provides all the exudate management benefits of ALLEVYN along with an adhesive for patients where dressing retention is paramount.

- Helps patients feel secure in their dressing
- Maintains an effective barrier against bacteria
- Manages exudate for up to 7 days
- No secondary dressing required

The confident choice in fluid management

## ALLEVYN<sup>®</sup> Thin

Low to moderate levels of exudate

Conformable adhesive dressing for use on wounds with a moderate level of exudate

- Self-adhesive
- Flexible and highly conformable
- Maintains a moist wound environment
- Waterproof and bacteria proof
- Permeable to oxygen and water vapour
- Does not adhere to the wound

HIGHLY CONFORMABLE

## ALLEVYN<sup>®</sup> Non-Adhesive

Moderate levels of exudate

ALLEVYN<sup>®</sup> Non-Adhesive is a dressing ideal for compromised skin, which can be cut if required to meet individual patient needs.

- Gentle and skin friendly
- Adaptable for awkward areas
- Soft and highly conformable
- Manages exudate for up to 7 days
- Available in a wide range of sizes
- The ALLEVYN<sup>®</sup> Heel is shaped for body contours including the heel and elbows

IDEAL FOR FRAGILE SKIN

## HydroTac®

HydroTac® is a foam dressing with a unique hydrogel wound contact layer. It effectively absorbs low to moderate exudate while at the same time providing the optimal environment for wound healing. HydroTac® is gentle on the skin and can remain in place up to 7 days.

- Wounds healed up to 23.5% faster than with silicone wound contact layer<sup>(1)</sup>
- Donates and selectively balances moisture to maintain optimal moist wound healing environment
- bacterial-resistant outer layer to minimise risk of contamination

## Cutimed® Siltec

Designed to work for you

The right combination of specially designed materials makes Cutimed® Siltec® deliver the performance you expect from a foam dressing.

### CUTIMED® SILTEC® PRODUCTS PROVIDE:

Safe fluid handling Wound exudate has to be absorbed reliably and retained in the foam safely. Cutimed® Siltec® absorbs exudate vertically and transports it to the "hot melt Super Absorbent stripes" on top of the foam layer. They expand and form a gel that safely retains a large volume of fluid, even under compression. The breathing properties of the polyurethane film adapt moisture evaporation to the saturation level. Its transparency allows inspection of the level of saturation from outside and helps to determine the ideal time for redressing the wound.

- Absorption of viscous exudate Cutimed® Siltec® performs well in handling viscous exudate. This is the result of the perforation of the silicone adherent layer and the large pores of the foam. Lab tests show that Cutimed® Siltec® is capable of absorbing high levels of viscous fluid over a period of at least 16 hours.
- Protection of the wound edge with minimised risk of maceration Cutimed® Siltec® absorbs fluid vertically, drawing it away from the wound edges, spreading it evenly inside the foam. Additionally, the adherent silicone layer covers the wound edge and protects it from contact with exudate. This minimises maceration yet keeps the wound sufficiently moist for the healing process.
- Minimal risk of tissue ingrowth While allowing fluid transmission, the silicone adherent layer forms an effective barrier against tissue ingrowth

Tegaderm +Pad Dressings creates a transparent, sterile, barrier that is impervious to liquids, bacteria and viruses\* providing an effective barrier to external contaminants.

\* *In vitro* testing shows that the transparent film dressing provides a viral barrier from viruses 27nm in diameter or larger while the dressing remains intact without leakage.

Open the packaging and remove sterile dressing. Peel the paper liner from the paper-framed dressing, exposing the adhesive surface.

Position the framed window over the wound site and apply dressing. Press dressing into place then remove the paper frame and smooth down edges.

Seal securely around the wound site. Firmly smooth adhesive boarder to the skin.

## AsGUARD® Flex + Non Woven Island Dressing

AsGUARD® Flex + Non-Woven Island Dressings combine an absorbent pad with a soft and comfortable non-woven adhesive backing.

Ideal for

- simple and effective management of minor wounds

# LEUKOMED® WOUNDCARE RANGE

## THE LEUKOMED® RANGE FROM BSN MEDICAL

Designed to support a wide range of clinical and patient needs for acute and surgical wounds.

Leukomed® T Plus

- Water and bacteria proof
- Distinctive red strip allows for quick and easy application

Leukomed®

- Incorporates low allergy Fixomull® adhesive
- One way stretch makes it ideal for wounds over joints

Leukomed® Control

- Fully transparent to visualise the wound bed
- Water, bacteria and virus proof

Leukomed® T

- Low profile film
- Highly conformable

Leukomed® LA

- Can be placed either side down on the wound
- Ideal for people with fragile skin

## Leukomed® T

Leukomed® T is a transparent, waterproof, adhesive film designed for the fixation of primary dressings or the protection of non-exuding wounds. The bacteria and virus proof film provides a barrier against infection and the flexible, ultra-thin film feels "skin-like" when in-situ.

- Water, bacteria and virus proof
- Transparent, breathable
- Unique application technique with distinctive red strip
- Sterile

BE7238100	7.2cm x 5cm	Box/50	<b>\$31.66</b>
BE7238101	8cm x 10cm	Box/50	<b>\$53.24</b>
BE7238108	10cm x 12.5cm	Box/50	<b>\$96.13</b>

## Leukomed® T Plus

Leukomed® T Plus is an ultra-flexible and thin profile film dressing with a low adherent wound pad, providing secure absorption and excellent wearing comfort. Leukomed® T Plus is bacteria and virus proof which helps to reduce the risk of surgical site infections. The low profile film and the strong adhesion allows the dressing to stay in place for longer enabling less dressing changes and decreased risk of wound contamination.

- Water, bacteria and virus proof
- Unique application technique with distinctive red strip
- Ultra-thin and conformable film
- Sterile

## OPSITE<sup>◇</sup> Post-Op Visible

Waterproof, Bacteria-proof Dressing with see-through Absorbent Pad

OPSITE<sup>◇</sup> Post-Op Visible with its lattice structure foam pad and transparent top film, has been specifically designed to give you the ability to carry out regular assessments of the wound without the need to lift or remove the dressing. This allows you to react early to signs that could potentially delay the healing process.

### Key benefits for patients:

- Absorbent lattice structured foam pad
- Highly breathable waterproof outer film
- Perforated low-adherent wound contact layer
- Low allergy adhesive
- Easy application flexible carrier

## OPSITE<sup>◇</sup> FLEXIFIX GENTLE

Transparent Silicone Adhesive Film Roll

OPSITE<sup>◇</sup> FLEXIFIX GENTLE combines breathability, transparency and a seven day wear time to offer a silicone film roll for patients with fragile or at-risk skin. It removes cleanly, without disrupting fragile skin layers or causing patients undue pain.

- Conformable and extensible
- Minimises the risk of pain or discomfort on removal
- Easy to apply – can be lifted and repositioned without losing adherent properties
- Low friction, transparent film
- Shower and bacteria proof
- 7-day wear time

## OPSITE<sup>◇</sup> INCISE

Theatre Incise Drape

OpSite Incise Drape is a transparent, adhesive polyurethane film which allows the skin to breathe, preventing moisture build-up under the drape. As a result OpSite adheres throughout long surgical operations to the surrounding skin and most importantly to the wound edge.

### Features:

- Adheres right up to wound edge
- Transparent non-glare surface
- Thin yet extremely strong
- Conformable and elastic
- Provides a sterile working field around the operation site
- Holds drapes securely in place
- Each OpSite Incise Drape is sterile and individually wrapped in a peel apart pouch
- Sterilization is by ethylene oxide.

## 3M™ Tegaderm™ HP Transparent Film Dressing

Tegaderm™ HP Transparent Film Dressing provides all the benefits of a classic Tegaderm Film but has greater staying power in the presence of moderate amounts of skin moisture.

- The hydrophilic nature of Tegaderm™ HP makes it more adherent in moist conditions.
- Suggested application as primary or secondary dressing and for protecting skin on diaphoretic patients.
- Suitable dressing for hot and humid environments..
- Transparent dressings allow easy monitoring of wounds without the need to remove the dressing.

		Box/100

## 3M™ Tegaderm™ I.V. Advanced Securement Dressing

With Comfort Adhesive Technology

Tegaderm IV Advanced dressings are sterile, waterproof, breathable film that is impermeable to liquids, bacteria and viruses

- A force-shifting notch, highly breathable film, stabilisation strips and innovative border design secure and protect the catheter site.
- Two high-performing adhesives secure and stabilise, manage moisture, improve wear time and provide gentle release.
- Working with the breakthrough adhesive formula, the highly breathable film furnishes excellent moisture handling in warm environments and for diaphoretic patients.
- The overall design is engineered to offer a low-profile stabilisation system that provides patient comfort and reduces both dressing manipulation and catheter restarts.
- Sterile, waterproof, breathable film that is impermeable to liquids, bacteria and viruses
- Transparent dressings allow easy monitoring of wounds without the need to remove the dressing.

3M1682	5 x 5.7cm	Box/100	<b>\$125.95</b>

## MELOLIN<sup>◇</sup>

Smith+Nephew

Low-Adherent Dressing  
(Highly Absorbent)

MELOLIN<sup>◇</sup> consists of three layers:

- A low-adherent perforated film
- A highly absorbent cotton/acrylic pad
- A hydrophobic backing layer

This structure allows for drainage of exudate, reducing trauma to healing tissue.

## CUTILIN<sup>◇</sup>

Low-Adherent Absorbent Dressing

CUTILIN<sup>◇</sup> is a dressing for low to moderately exuding wounds that can be cut to shape without linting.

		Box/100	3+
BE76240	5x5cm (sterile)	\$29.90	<b>\$27.50</b>
BE76242	10x10cm (sterile)	\$74	<b>\$68</b>

## Leukomed<sup>®</sup> Low Adherent Wound Pad

For all wounds with low to moderate secretions, Leukomed LA provides reliable, non-stick absorption. The dressing is suitable for post-operative wounds and for casualty use, including clean and sutured wounds, abrasions, lacerations and minor burns. The extra-thick absorbent cotton core has high absorption capacity. At the same time, the water-repellent layer on the reverse prevents wound exudate from leaking.

- Less dressing changes are required.
- A suitable dressing for every need.
- Sterile

# + T.I.M.E. to say goodbye to biofilm

78% of all chronic wounds contain biofilm.<sup>1</sup>  
Act with certainty.

IODOSORB<sup>®</sup> 0.9% Cadexomer Iodine dressings overcome multiple barriers to healing, allowing you to take control of chronic wounds:

- Disrupts biofilm<sup>2,3</sup>
- Reduces bioburden<sup>4</sup>
- Absorbs exudate<sup>5</sup>
- Removes slough & necrotic tissue<sup>6,7</sup>

**Take control now.** Speak to a Smith+Nephew wound expert to understand more about the benefits of IODOSORB on 13 13 60.

Helping you get closer to zero wound biofilm.

## Smith+Nephew

## IODOSORB<sup>®</sup> Smith+Nephew

### Cadexomer Iodine Medicated Dressing

IODOSORB<sup>®</sup> is a sterile formulation of Cadexomer Iodine for the treatment and healing of chronic ulcers. When applied, the wound is cleaned as the dressing absorbs fluids, removes pus and debris and, forms a moist gel over the wound surface.

As it swells in situ the active iodine is gradually released, killing resident micro-organisms in the wound site. IODOSORB<sup>®</sup> has been shown to eliminate biofilm based bacteria in vitro.

**Features:**

- Changes colour to indicate when dressing change is needed

## ACTICOAT<sup>®</sup> Smith+Nephew

### Antimicrobial Barrier Dressing

ACTICOAT<sup>®</sup> dressings all contain nanocrystalline silver which kills a broad range of bacteria in as little as 30 minutes.

ACTICOAT<sup>®</sup> shields against bacterial penetration and reduces the risk of bacterial contamination, which can lead to infection. A moist wound environment is maintained in the presence of exudate which means less painful healing than a dry wound environment.

ACTICOAT<sup>®</sup> is effective for up to 3 days.

		Box/5	3+
SN66000808	5x5cm	\$106	<b>\$99</b>
SN66000789	10x10cm	\$199	<b>\$189</b>

## ACTICOAT<sup>®</sup> 7 Smith+Nephew

### Antimicrobial Barrier Dressing

ACTICOAT<sup>®</sup> dressings all contain nanocrystalline silver which kills a broad range of bacteria in as little as 30 minutes.

Indicated as an antimicrobial barrier layer over partial and full thickness wounds such as pressure ulcers, venous ulcers, diabetic ulcers, burns, donor and recipient graft sites.

ACTICOAT<sup>®</sup> 7 if effective for up to 7 days.

		Box/5	3+
SN66000809	5x5cm	\$174	<b>\$159</b>
SN66000796	10x12.5cm	\$469	<b>\$439</b>

## ACTICOAT<sup>®</sup> Flex Smith+Nephew

ACTICOAT<sup>®</sup> Flex is a knitted polyester weave, coated in nanocrystalline silver. The dressing is highly flexible and conformable and stretches to allow patient movement. The open weave design allows easy fluid, wound exudate migration and can be used underneath Negative Pressure Wound Therapy (NPWT).

Pre-moisten the dressing for acute and low exuding wounds.

## ALLEVYN<sup>o</sup> Ag Absorbent Silver Foam Dressing

ALLEVYN<sup>o</sup> Ag gives you all the exudate management benefits of ALLEVYN with the addition of silver

- ALLEVYN Ag fights bacteria for up to seven days providing reassurance for any wound where you suspect infection
- Combined foam and silver means you only need to use one dressing, making your choice simple
- Effective against a broad range of wound pathogens, including bacteria, yeast, fungi and antibiotic-resistant strains
- Ideal for pressure ulcers, venous ulcers, diabetic ulcers, burns, donor sites, fungating/malignant wounds and surgically dehisced wounds
- Moderate levels of exudate

### ALLEVYN<sup>o</sup> Ag Non-Adhesive

## HydroClean® plus

HydroClean® plus is a unique Hydro-responsive wound dressing that has been developed to provide a cleanse, debride, de-slough and absorb function to facilitate optimal wound bed preparation. HydroClean® plus contains PHMB to kill bacteria inside the dressing, Ringer's solution to continuously rinse & cleanse the wound bed and super absorbent polymers to absorb the exudate and wound debris.

- Unique rinsing/absorption mechanism
- Up to 3 day wear time
- Excellent cleansing/debriding effect

## Atrauman AG

- Silver-containing triglyceride ointment coated dressing made of hydrophobic polyamide lattice tulle, coated with elemental silver.
- Atrauman Ag has an antibacterial effect against gram-negative and gram-positive bacteria when in direct contact with the dressing.
- Permeable to exudate, particularly soft and drapable, does not stick to the wound; even effective during long-term use.

		Box/10	+2

## Mepilex® Transfer Ag

Mepilex® Transfer Ag is an antimicrobial exudate transfer layer designed to allow exudate to transfer to a secondary dressing. You can use it to treat exuding burns and chronic and acute wounds. Less painful dressing changes

- Rapid and sustained antimicrobial activity
- Designed for exuding wounds and for large partial thickness burns
- Easy to use for difficult-to-dress wounds
- Can be cut to suit different shapes

		Box/5
BO394100	10 x 12.5cm	<b>\$159</b>
BO394000	7.5 x 8.5cm	<b>\$174</b>

## Mextra®

Mextra® Superabsorbent wound dressing delivers high fluid absorption and retention. You can rely on it to help treat highly exuding wounds such as venous leg ulcers, diabetic foot ulcers and some pressure ulcers.

- High fluid handling capacity
- The dressing is soft and conformable
- Protects the periwound area
- Has protease modulating properties

		Box/10	+2
BO610000	12 x 12.5cm	\$29	<b>\$25</b>
BO610300	7.5 x 8.5cm	\$56	<b>\$49</b>

## Mepitel® Film

Mepitel® Film is designed to protect fragile and sensitive skin and minimise risk of skin breakdown. You can use this gentle breathable film as an only dressing or in combination with other products.

- Protects fragile and sensitive skin
- Minimises risk of skin breakdown
- Transparent for easy inspection
- Conforms well to different body contours

		Box/10	+2

**BRAUN**  
SHARING EXPERTISE

- Non-adherent: protects fragile granulation tissue
- Atraumatic removal
- Allows vertical passage of exudate through dressing
- Soft and conformable
- Compatible with topical treatments/vacuum therapy

**Advanced Silicone technology at exceptional value**

## ADAPTIC

Less stick, less pain

**A non-adherent dressing that really is ADAPTIC**

ADAPTIC is indicated for dry to highly exuding wounds where adherence of dressings and exudate is to be prevented, including:

- First and second degree burns
- Abrasions
- Grafts
- Pressure ulcers

		Box/50	3+

## CUTICERIN®

Impregnated Gauze Dressing

CUTICERIN® is an impregnated, non-aqueous, non-linting dressing ideal as a wound contact layer for burns, abrasions and other wounds with superficial skin loss. It reduces the risk of granulation tissue growing through the dressing, decreasing trauma on removal.

- Low adherent
- Minimises pain at dressing changes
- Permeable to air and exudate.

**ALTERNATIVE TO ADAPTIC®  
SAVE MONEY**

		Box/50	3+

SmithNephew

## Mepilex® Transfer

Foam primary contact layer for transferring exudate to a secondary dressing

Mepilex® Transfer foam exudate transfer layer is designed to be used as a primary wound contact dressing.

- Minimises pain during dressing changes
- Convenient and conformable for difficult-to-dress wounds
- You can cut it to suit various wound shapes
- Transfers exudate away from the wound, minimising the risk of maceration
- Promotes patient comfort – it's thin and comfortable to wear

		Box/10	
BO294700	10 x 12cm	\$95	
BO294600	7.5 x 8.5cm	\$54	

Mölnlycke®

## Mepitel® One

Mepitel One is adhesive on one side, so it's easier for you to handle. Plus it's transparent, so you can instantly assess healing progress without removing the contact layer.

- True undisturbed healing – it can remain in place for up to 14 days
- Safetac technology – minimising the risk of skin damage and pain to the patient
- Is cost-effective
- Suitable for a wide variety of indications

Mölnlycke®

		Box/10	+2
BO289300	10 x 12cm	\$187	<b>\$169</b>
BO289100	7.5 x 8.5cm	\$115	<b>\$104</b>

## Cuticell® Contact

Cuticell Contact is a gentle and highly conformable silicone wound contact layer for pain-free and atraumatic dressing changes. It's perforated transparent structure enables easy and effective wound management.

### Wound-friendly right from the start

Once applied, Cuticell® Contact can remain in place for several days, protecting the wound. Exudate can easily pass through the perforations and there is minimal risk of tissue in-growth. As the adhesive is only on the wound contact side, secondary dressings can be easily changed without causing trauma to the wound.

- Undisturbed healing
- Pain-free, atraumatic dressing changes
- Improved patient compliance
- Cost-effective

### Silicone wound contact layers are suitable for use on the following wound types:

- Cuts
- Abrasions
- Burns
- Chronic wounds (also under compression)
- Lacerations
- Blisters
- Skin lesions
- Also appropriate for skin protection (e.g. after radiation treatment)
- Can be used in combination with antiseptics
- Suitable for especially sensitive and fragile skin

		Box/5

BE72680-03	15 x 25cm		<b>\$302</b>

## Atrauman®

Atrauman® is a triglyceride impregnated wound contact layer. It provides a soothing protective layer to wounds such as skin tears, abrasions, grafts, and minor burns. Unlike paraffin, triglyceride ointment is permeable to exudate, preventing building up on the wound bed, while preventing dressing adherence to the wound.

- Gentle: allows atraumatic removal thanks to triglyceride based ointment
- Safe: heals in an optimal moist environment
- Economical

				2+

## Atrauman® Silicone

Atrauman® Silicone is a soft and conformable wound contact layer ideal for wounds such as skin tears, grafts, donor sites, abrasions and challenging to dress areas. It allows pain free dressing changes for those patients with fragile skin. Atrauman® Silicone can stay in place for up to 7 days and often only the secondary dressing needs to be changed. The small weave structure prevents the tissue growing into the dressing.

- Maximum comfort: pain-free dressing changes thanks to the silicone coating
- Easy to use: thin, conformable, can be cut
- Cost effective: can stay in place for up to 7 days

## Cuticell® Classic

### The Paraffin Impregnated Dressing

Cuticell® Classic is the economical solution when treating exuding wounds. The low-adherent dressing is made of open weave cotton gauze impregnated with soft paraffin – to facilitate dressing change and to support a moist environment for wound healing.

- **Product Details**
- Impregnated with soft paraffin
- Open weave 100% cotton fabric with interlocking threads
- **Indications**
- First degree and second degree burns
- Lacerations and abrasions
- Leg ulcers
- Donor and recipient skin graft sites

BB400523	Wound Gel-X 30ml	\$35	<b>\$32</b>

## Cutimed® Gel

Cutimed® Gel is a clear, amorphous hydrogel for the treatment of necrotic and sloughy tissue in chronic wounds

- Supports autolytic debridement in necrotic and sloughy wounds
- Provides moisture to dry wounds, even in later stages of wound healing
- Pure formulation: there is less risk of an allergic reaction as Cutimed® Gel is preservative-free
- Compatible with secondary dressings: Cutimed® Gel can be covered with any type of secondary dressing, e.g. film dressings
- Superior moisture donation allows for less frequent dressing changes and effective debridement

		Box/10

BE72610-01	15g	<b>\$56.18</b>
BE72610-02	25g	<b>\$64.47</b>

## Askina® Gel

Hydrogel dressings are used to donate fluid when used on dry to low exuding wounds but they can also absorb exudates from low to moderately exuding wounds.

Askina® Gel is based on unique formulation which provides more hydration to the wound and demonstrates an outstanding stability.

A special delivery system using a cannula allows reaching deeper wounds such as fistulas and tunnels.

## Zetuvit® Plus

The powerful wound dressing pad for heavily exuding wounds

**BEST SELLER!**

Zetuvit® Plus is a super absorbent dressing suitable for the management of heavily exuding wounds. Zetuvit® Plus has outstanding absorbency capacity due to super absorbent polymers within the dressing for rapid and reliable fluid retention.<sup>1</sup> This cotton based dressing is soft and conformable for maximum patient comfort. The green, water repellent backing material prevents strike through and is permeable to air.<sup>2,3</sup>

- Outstanding absorbency
- Soft padding for patient comfort
- Excellent cost-effectiveness

**Highly absorbent**

## Mesorb® Absorbent Dressing With Strike-Through Exudate Barrier

Mesorb is a soft highly absorbent dressing that can retain large amounts of wound exudate. The fluid-repellent strike-through barrier helps prevent exudate from soiling clothing and bed linen. Areas of use: Moderately to heavily exuding wounds. Can be used as a primary dressing (directly on the wound) or as a secondary dressing, where high absorbency is required (e.g. together with Mepitel® or Mepilex® Transfer).

# Products for minor burns

## Soothe

## Protect

## Fade

### SOLOSITE<sup>◊</sup>

SOLOSITE is used to create a moist wound environment for the treatment of minor burns. SOLOSITE is cooling and soothing on application.<sup>1</sup>

### OPSITE<sup>◊</sup> POST-OP

OPSITE POST-OP is a waterproof film dressing that provides a barrier to protect the burn from bacteria.<sup>2</sup> OPSITE POST-OP helps to maintain a moist wound environment and can stay in place for up to 7 days.<sup>3</sup>

### CICA-CARE<sup>◊</sup>

CICA-CARE Silicone Gel Sheet significantly reduces colouration and itchiness of raised burn scars.<sup>4</sup> CICA-CARE is demonstrated to be effective in the treatment of scars up to 20 years old.<sup>5</sup>

## CICA-CARE<sup>◊</sup> Silicone Gel Sheet

CICA-CARE<sup>◊</sup> is a soft self-adhesive silicone gel sheet for the treatment and prevention of scarring. It is clinically effective in flattening red and raised scars, both old and new, in up to 90% of cases.

CICA-CARE<sup>◊</sup> Gel Sheet can be cut to size to fit most scars. The silicone membrane and gel combination make CICA-CARE<sup>◊</sup> more durable and less likely to denature in comparison to other silicone gel sheets. It is reusable, lasting 2-4 weeks or more.

## ALGISITE<sup>◊</sup> M

### Calcium Alginate Dressing

ALGISITE<sup>◊</sup> M is a calcium-alginate dressing which forms a soft gel when it comes in contact with wound fluid, absorbing excess moisture. ALGISITE<sup>◊</sup> M utilises the proven benefits of moist wound healing, which can result in faster healing of even difficult wounds.

- Highly absorbent
- Easy to remove
- Conforms to wound contours
- Promotes early healing
- Less fibre shed

## PICO<sup>o</sup> 7

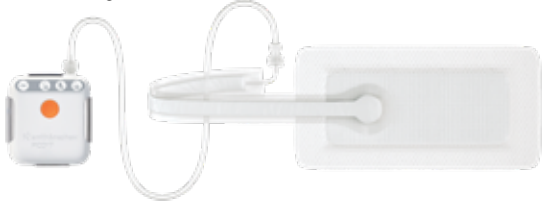

Single Use Negative Pressure Wound Therapy System

PICO 7 is a novel<sup>1</sup>, canister free, single use negative pressure wound therapy (sNPWT) system that offers portable<sup>1-3</sup>, accessible<sup>2,3</sup> and affordable NPWT<sup>3,4</sup>.

The system consists of a revolutionary, gentle silicone adhesive dressing with AIRLOCK<sup>o</sup> technology, that effectively delivers NPWT to indicated wound types using a small, simple to use, battery-operated device<sup>1,5</sup>.

PICO 7 sNPWT pump generates an effective negative pressure of -80mmHg and provides therapy for up to 7 days.

- Clinically effective for the treatment of acute<sup>6-8</sup>, chronic<sup>9</sup> and surgically closed incision sites<sup>10</sup>
- Twice as effective at dealing with air leaks, compared to the previous version of PICO sNPWT<sup>11</sup>
- Can be used in hard-to-seal or awkward places<sup>12</sup>.
- Improved patient experience with a more efficient, quieter pump and integrated belt clip for full portability<sup>13,14</sup>.
- A new 'dressing full' change indicator, designed to help optimise dressing change frequency, including an integrated 'start date' note area.
- The AIRLOCK<sup>o</sup> Technology distributes pressure evenly for optimal comfort and performance<sup>15</sup>
- The PICO dressing evaporates up to 80% of fluid, whilst 20% is absorbed.<sup>15</sup>

## Cuticell<sup>o</sup>

The Ointment Dressing

Cuticell<sup>o</sup> is soothing and low-adherent, thus minimising pain at dressing changes. The primary wound contact layer is made of smooth acetate fabric impregnated with non-medicated Eucerit<sup>o</sup> ointment. The result: an ointment dressing that ensures that the wound is not disturbed and helps maintain a moist environment that supports wound healing.

- **PRODUCT DETAILS**
- Eucerit<sup>o</sup> based ointment
- Smooth acetate fabric
- Defined small mesh size
- Permeable to air and exudate

- **INDICATIONS**
- For superficial exuding wounds such as:

- First and second-degree burns
- Lacerations, cuts and abrasions
- Donor and recipient skin graft sites

## Leukomed<sup>o</sup> Control

Leukomed<sup>o</sup> Control combines a highly innovative hydropolymer technology with the protective and fully transparent benefits of the Leukomed<sup>o</sup> film. This advanced Post-Op dressing makes early detection of wound infection possible without lifting or changing it. Leukomed<sup>o</sup> Control provides ideal healing conditions by creating an optimal moisture level and adapting to skin's elasticity. The dressing puts medical caregivers in control of the healing progress and allows for quick mobilization of the patient. Leukomed<sup>o</sup> Control comes with:

- Transparent, visual control to assess therapeutic wound progress
- Unique application via simple step-by-step technique allows for precise placement and quick wound protection
- Thin and absorbent hydropolymer pad keeps the wound clean and ready for epithelialization
- Ultra-thin, highly breathable and conformable film for a second skin feeling

WOUND & BURN DRESSING  
**MEDIHONEY®**  
with Active *Leptospermum* Honey

Medical-grade antibacterial honey products for the management of wounds and burns

**How does MEDIHONEY® help to promote healing?<sup>1-7</sup>**

- Cleanses and debrides due to its high osmolarity 3
- Helps to lower overall wound PH 6,7
- Promotes a moisture-balanced environment conducive to wound healing
- Is easy to use, with the potential for extended wear times (depending on level of exudate)

VITAL are a distributor for Medihoney® and Derma Sciences Ranges in Australia
