Askina[®] Barrier Film Spray

Askina[®] Barrier Film Spray is a no sting, rapid drying, breathable skin barrier designed for wound care to prevent skin breakdown caused by friction or moisture.

- Protection of vulnerable areas: heels, elbows, toes, hips – from the first signs of reddening caused by friction
- Protection of incontinent patients' skin
- Round fixation sites for drainage tubes and external catheters
- To maintain the integrity of newly healed skin to stop secondary breakdown.

SHARING EXPERTISE

Askina[®] Barrier Cream

EXCEPTIONAL VALUE

Askina[®] Barrier Cream acts as a lasting protective barrier on skin of incontinent patients, exposed to the irritating effect of urine and stools.

When applied, it is quickly absorbed, leaving an invisible breathable water repellent layer, resistant to wash-off. It efficiently moisturizes very dry skin. It can also be used for skin protection whenever there is a risk of skin breakdown due to prolonged contact with body fluids.

Exufiber[®]

Exufiber[®] is a sterile nonwoven gelling fibre dressing. It's versatile, so you can use it to treat a wide range of highly exuding and cavity wounds, such as leg and foot ulcers, pressure ulcers and surgical wounds. When Exufiber comes into contact with wound exudate, it transforms into a gel. The gel helps support a moist wound healing environment. And it stays in one-piece so you can remove it easily when you change the dressing
