

## 3M™ Coban™ Self-Adherent Wrap

- The self-adherent wrap that sticks to itself without the need for adhesives, clips or pins.
- Can be used to secure, compress and support
  - Lightweight and porous
  - Protects primary dressings
  - The wrap will not slip so no need for frequent adjustments
  - Product is supplied as 2 metres unstretched (equates to 4.5m fully stretched)
  - Also available in latex free

		Each	5+
3M1581	25mmx2m	\$2.50	<b>\$2.20</b>

### 3M™ Coban™ 2 Layer Compression System

Used to achieve effective compression for the treatment of venous leg ulcers and related conditions. Indicated for an ABPI of 0.8 and above.

**Each Kit contains:**

- Roll 1 - Comfort Layer 10cmx2.7m
- Roll 2 - Compression Layer 10cmx4.7m

	Each	2+
3M2094	\$36.95	<b>\$35.75</b>

### 3M™ Coban™ 2 Lite Compression System

Designed for patients less tolerant of compression therapy, including those who have mixed aetiology, are new to compression or where tolerance is not known, are frail, or are less mobile. Suitable for ABPI 0.5 and above.

**Each Kit contains:**

- Roll 1 - Comfort Layer 10cmx2.7m
- Roll 2 - Compression Layer 10cmx4.7m

	Each	2+
3M2794	\$36.95	<b>\$35.75</b>

### JOBST® ULCERCARE

Kit and Replacement Liners

JOBST® ULCERCARE is a 2-in-1 compression system for the effective management of venous leg ulcers, once oedema has been reduced. The 2 layer stocking system provides sustained graduated compression of 40 mmHg!

Designed for patient concordance and independence and reduced nursing time.

The zip on the outer stocking facilitates dressing change, personal hygiene and skin care.

The inner liner provides 17 mmHg1 and can be worn 24 hours a day, helping to manage lower leg oedema.

Patients can wear their own shoes or slippers due to the low product profile.

Latex Free Starter Kits and Replacement Liners.

**Kit - Zipper Left Side (Includes 1 Stocking, 2 Liners)**

## Tensopress® Elastic Compression Bandage

Tensopress conforms smoothly and evenly to provide the patient with a comfortable yet firm bandage. A central yellow line has been included to aid correct overlap.

- Consistent stretch and regain for controlled compression
- Durable elastic construction for sustained compression
- Conformable design to avoid ridging and uneven pressure
- Soft and light for superior patient comfort

		Each	3+
SN4347	7.5cmx3m	\$22.85	<b>\$21.30</b>
SN4348	10cmx3m	\$27.15	<b>\$25.30</b>

## PROFORE®

### Multi-layer Compression Bandage System

PROFORE® is a convenient presentation of the clinically effective four-layer bandage system for venous leg ulcer management. It reinforces a safe and consistent protocol to heal up to 75% of venous leg ulcers in 12 weeks.

Proven effective in both hospital and community treatment studies, PROFORE® is designed to deliver 40mm Hg pressure at the ankle, decreasing to 17mm Hg at the knee, therefore offering effective graduated compression.

- Effective compression
- Graduated compression
- Sustained compression
- Convenient
- Cost-effective
- Can be left in place for up to a week

#### Presentation

Each system pack contains the following:

- 1 x wound contact layer
- 1 x natural padding bandage
- 1 x light conformable dressing
- 1 x light compression bandage
- 1 x flexible cohesive compression bandage

Kit

**\$45**

SN66050016

## PROFORE® Lite

### Multi-layer Compression Bandage System

PROFORE® Lite is a multi-layer, reduced-compression bandage system suitable for mixed aetiology leg ulcers. PROFORE® Lite is best used on ankle circumferences greater than 18cm (padded).

- A 3-layer compression bandage system
- Clinically proven to heal over 70% of venous leg ulcers within 12 weeks<sup>1</sup>
- Reduced compression for mixed aetiology ulcers (ABPI 0.6-0.8)
- Provides up to 7 days wear time
- Available on RBPS

Kit

## COOLGRIP<sup>™</sup> Tubular Elastic Support Bandage

CoolGRIP is a tubular elastic support bandage ideal for the treatment of oedema associated with muscle sprains and strains, management and treatment of lymphoedema and symptoms of varicose vein conditions and to support weak joints and muscles.

- The fine elastic threads are spaced close together, distributing pressure more evenly than conventional bandages
- Innovative mesh structure enhances air circulation to the skin, ensuring a more comfortable bandage, especially in warmer climates
- Made from cotton and polyester, with latex-free elastic threads
- Provides 14-18mmHg sub-bandage pressure under a double layer.

		Each
SN1527	Size A 4.5 x 10m	<b>\$19.60</b>

## COOLFAST<sup>™</sup> Tubular Elastic Support Bandage

A tubular retention bandage ideal to use when needing to secure dressings. CoolFAST can also be used to provide protection over creams or ointments used for dermatological purposes, such as eczema or wet wrapping.

- Has mild elastic properties provided by fine elastic threads incorporated into the fabric
- Excellent stretch and contraction properties ensure that dressings are held securely in place
- CoolFAST maintains its elasticity over a long period due to its unique knit structure
- Made from cotton and viscose, with latex-free elastic threads.
