

Roche Point-of-Care Solutions

for on the spot decisions

Point-of-Care Testing (PoCT) offers multiple benefits, particularly by improving turn around time of result, thus supporting the initiation of earlier and more effective treatment.*

- Better patient outcomes
- Increased patient satisfaction and retention
- Reliable, easy and efficient solutions to support your decision
- Improved workflow efficiency

CoaguChek® Pro II

Coagulation testing at ALL points of care

Now, achieve new insight into the coagulation cascade with fast, accurate **PT/INR** and **aPTT** results* for confident treatment decisions when and where they matter most.

Urisys 1100® urine analyzer

Minimise potential transcription errors with the semi-automated urine test strip reader

Designed to read and evaluate the urine test strips **Combur¹⁰ Test UX** with results in 60 seconds.

cobas h 232 POC system

Time critical results in 12 minutes or less

Rapid and easy determination of cardiac markers such as **Troponin T**, **D-dimer** and **NT-proBNP** for supporting on the spot decisions and treatment.

cobas b 101 system

Supporting early detection and management of diabetes and dyslipidaemia at PoCT

Fast turnaround time providing results for both **HbA_{1c}** and **Lipids** (TC, HDL, TG, LDL, non-HDL AND TC/HDL ratio).

Accutrend® Plus

The hand-held device for measuring 4 major CVD[†] risk parameters

- Hand-held meter for ease of use
- Accurate results in less than 3 minutes**
- Single drop of capillary or venous blood
- "Out of meter" strip dosing and no cross-contamination

Four tests in one instrument!

- Cholesterol
- Glucose
- Triglycerides
- Lactate

Kit Contents:

- Meter
- Guide
- Case

CoaguChek® Pro II

The next generation that makes all the difference for compliance and effective coagulation monitoring.

When it comes to patient management, the right tool can make all the difference. CoaguChek Pro II brings simplicity, accuracy, and connectivity together for coagulation monitoring that will impact both you and your patients.

- Results within minutes for PT/INR and aPTT
- Minimum 8 µL drop of capillary, venous or arterial fresh blood
- With built-in WiFi to enable WLAN connectivity
- 2-D barcode scanner
- Touch screen operation
- QR code communication capability
- Patient/operator ID management and printer option
- Quality control (QC) and operator lockouts
- Large memory capacity with 2000 patient and 500 QC results
- Insensitive to heparin up to 3 IU/mL blood, allowing for the rapid transition from heparin to warfarin therapy¹

Reference: 1. CoaguChek PT and aPTT Test Package Insert.

\$899

BIL841190

CoaguChek® XS

A convenient, portable and user-friendly instrument for monitoring oral anticoagulation therapy. It determines the INR value from a drop of capillary whole blood – it's simple, precise and reliable.

- INR results produced in one minute
- Requires a simple finger prick to obtain a small 8 µL drop of capillary blood
- Provides more comfort and convenience as venous blood sampling is not needed
- Built-in quality control checks each and every strip automatically
- Lab-equivalent accuracy and precision

The Accu-Chek Safe-T-Pro Plus lancing device: Ideal for different types of patients and almost pain-free¹

The clever choice:

One of the few available professional lancing systems with 3 adjustable depth settings.

Its Safe-T Technology provides patient and user protection and ease of use.

- Sterile cap and built-in safety mechanism to ensure single use and easy disposal²

- 3 adjustable depth settings* in one device:²
 - 1.3mm
 - 1.8mm
 - 2.3mm
- 3-facet cut, siliconised needle for gentle lancing (diameter 0.63 mm, 23 G)

- Easy handling due to ergonomically sound T-shape design

- Available in a convenient box with 200 single-use lancing devices
- Only one type of lancets to store saves on space and costs

Also suitable for children <1 year and even neonates²

Synthetic Cannabis (Kronic) Test

The first on-site test for the detection of synthetic cannabis in urine is now available. Commonly called Kronic, K2, Spice or Fake Weed, synthetic cannabis has been virtually undetectable until now with reliable results in just a few minutes. Now detects the 16 most commonly found chemicals and now also available in the DrugCheck NxStep Onsite Urine Drug Screen.

\$11.50

RPM003

Oral Fluid (Saliva) Drug Screen

The SalivaScan Oral Fluid Drug Screen is very easy to use and can detect up to 6 different drug classes in saliva in just 5-7 minutes.

Drug Classes detected:

- Amphetamines
- Benzodiazepines
- Cocaine
- Methamphetamine
- Opiates
- THC

	Each	25+
RPM021	\$19.00	\$18.00

Oral Fluid (Saliva) is ideal for random drug testing where ruling out impairment caused by illicit drugs is important.

Complies with AS4760

AlcoCheck™ FC300e Breathalyser

- Evidential breath alcohol tester
