

Mocom B Series Sterilisers

Mocom B Classic Series Sterilisers

Features:

- 6 sterilisation programs
- Conforms to EN 13060:2004
- Programmable Helix & Vacuum test
- Water conductivity sensor
- Easy to operate
- Very reliable
- Secure traceability by identification of users via unique PIN codes
- Cycle data recorded as a PDF file on internal memory and transferable to PC by USB
- 2500 cycle /24 month warranty

Mocom Australia authorised technical support available nationwide.

WARRANTY
2500 cycles
or 24 months

Mocom S Classic Steriliser Series

The S Classic Series is made of quality components and materials to provide long-lasting performance.

Available with 17 and 22 litre chamber volumes, it features a practical black and white LCD display and a soft-touch keypad. S Classic autoclaves are electronically controlled and equipped with a stainless steel sterilisation chamber.

The practical single-stage air extraction system allows execution of advanced S-type cycles, providing suitable sterilisation of solid instruments and hollow load products. A final, highly efficient vacuum drying stage means that bagged loads can also be sterilised.

The innovative steam generator and exclusive hydraulic circuit ensure outstandingly fast and stable execution of the sterilisation cycles.

The S Classic Steriliser Series offers professional S class sterilisation and is suitable for:

- General Practices
- Medical Centres
- Specialist Medical Practices
- Podiatry Clinics
- Veterinary Clinics
- Tattoo Studios
- Body Piercing Studios
- Beauty Salons

The next generation of medical sterilisers!

Some of the amazing features include:

- 6 sterilisation programs one of which is customizable.
- New large water fill & empty tanks allowing easy access for filling, inspecting & cleaning.
- User management system allowing for on screen cycle monitoring & post cycle release. No requirement for a printer or storing thermal paper printouts.
- Delayed cycle start option meaning the Vacuum test can be programmed to start before the practice opens saving you time.
- On screen alerts for scheduled maintenance.
- Included in the Australian Register of Therapeutic Goods (ARTG) and fully compliant with the design registration requirements for Occupational Safety and Health in Australia.

ULTRASONIC CLEANER FXP10

The FXP series of ultrasonic cleaners are designed for Medical, Dental, Laboratory and where all forms of contamination are lightly deposited. It is the essential partner in maximising the efficiency of the cleaning process.

All units incorporate Lateral Oscillation Technology for uniform cleaning results. The internal basket system allows the lid to seal the working solution, avoiding evaporation and reducing ultrasonic acoustic levels.

The clear and easy design with compact and quiet operation make these products the market leaders.

Features

- All exterior surfaces are 3mm Palopaque
- Pressed stainless steel tank
- A single tank system with rounded corner reflex design
- Mechanical timer
- Polyester coated transducers
- Internal fitted basket
- Sealing lid

Titens Emulator

Type 6 chemical emulator for load verification and diagnostics

Titens Monitor HP

Type 4 chemical indicator for economy and performance

EZTest

Biological indicator for validation

Getinge is a leading global provider of products and systems that contribute to quality enhancement and cost efficiency within healthcare.

GETINGE

Chemical Monitoring

There are different types of chemical indicators for exposure and pack monitoring in steam sterilisers. These chemical indicators are designed to react to the critical variables required for steam sterilisation to occur: time, temperature and the presence of steam. The Australian Standards for Sterilisation require the use of chemical indicators to monitor the sterilisation process. There are six types.

Type 1: Process Indicators

Process indicators are designed for use with individual items (e.g. packs, containers) to show that the unit has been directly exposed to the sterilization process and to distinguish between processed and unprocessed items.

Autoclave Tape & Batch Labels are examples of Type 1 Process Indicators..

Type 2: Indicators for use in Specific Tests

Type 2 indicators are intended for use in specific test procedures as defined in relevant steriliser/sterilisation standards.

Air Elimination Tests and Helix Tests are examples of Type 2 Indicators.

Type 3: Single critical process variable indicators

A single critical process variable indicator are designed to react to one of the critical process variables and is intended to indicate exposure to a sterilisation process at a stated value of the chosen critical process variable.

Type 4: Multicritical process variable indicators

A multicritical process variable indicator are designed to react to two or more of the critical process variables and are intended to indicate exposure to a sterilisation process at stated values of the chosen critical process variables.

Type 5: Integrating Indicators

An integrating indicator is designed to react to all critical process variables. The stated values are generated to be equivalent to, or exceed, the performance requirements given in the ISO 11138 – series for Biological Indicators. The minimum stated value is related to the minimum values required to achieve sterilisation.
NOTE The stated values demonstrate how the indicator integrates over the temperature range.

Type 6: Emulating indicators

An emulating indicator is designed to react to all critical process variables for specified sterilization processes. The stated values are generated from process variable of the specified sterilisation processes.

3M™ Comply™ Indicator Tape for Steam Sterilisation (Autoclave Tape)

Type 1

Lead Free, Solvent Free, Latex Free

3M adhesives are engineered to fit our customers' needs and are used in such diverse products as airplanes and cell phones. The industry-standard product for exposure monitoring now has even more to offer.

- Does not require hazardous waste disposal
- Redesigned packaging uses up to 30% less plastic
- Convenient, individually wrapped, easy-to-open rolls
- Sustainable, solvent-free manufacturing process

Green Card T Air removal & steam penetration test

Type 2

The Green Card T is specially packaged for daily monitoring of pre-vacuum steam sterilisers operating at 134°C /273°F to detect the presence of residual air. Residual air can defeat pre-vacuum steam sterilisation. The special pouch packaging prevents the indicator card from being exposed to excessively wet steam conditions that are sometimes present in Benchtop steam sterilisers. Simply clip the pouch containing the Green Card to your autoclave rack and process. A uniform green colour change of the matrix signifies a pass.

ATAUS415

3M™ Comply™ Steam Chemical Integrator 1234B

Tested to be equivalent to, or exceed the performance of Biological Indicators (ISO 11138)

For use in all sterilisation cycles from 121oC to 135oC, therefore eliminating the need to identify correct Type-6 cycle-specific Emulating indicator - reducing chemical indicator inventory .

When the colour bar moves anywhere into the ACCEPT area, all the critical parameters (Time/Steam/Temperature) have been met.

This Type 5 Integrator to be used in every load, by placing it in each pack, pouch or tray to be sterilised.

Chemical Indicators are used in conjunction with Biological Indicators, but never as a replacement for them.

Easy to Read

Meditrax Surgery Sterilisation & Patient Traceability Module

The Meditrax Surgery Sterilisation & Patient Traceability module is specifically designed for surgery requirements, it is easy for staff to use and is adaptable to many different surgery settings.

The Meditrax Surgery Sterilisation & Patient Traceability module is intended to identify and log every cycle of a surgery steriliser and any equipment which has passed through this process and has been used on a patient.

To provide added security for you and your patients, you must be able to identify any sterilised item or equipment that has been used on a patient, proving that it has successfully been through a decontamination and sterilisation process.

Key features:

- Traceability from patient records to sterilizer records
- Documents to AS/NZS 4815 standards
- Document integrity
- Full audit trail traceability
- Steriliser maintenance record
- Staff data linked to the above

ATSSM006	Meditrax Surgery Module Sterilizer Log Book	Each	\$38.00
ATMHRPII	Meditrax Batch Recall Plus II Log Book (Wrapped Products Only)	Each	\$39.00
