

# Making Skin Closure Fast and Simple.

## 3M™ Steri-Strip™ Adhesives Skin Closures

Clinical evidence shows wounds closed with 3M Steri-Strip skin closures:

- Provide greater resistance to infection than sutured/stapled wounds<sup>1,2</sup>
- Provide improved cosmetic results over sutured/stapled wounds<sup>1,2</sup>
- Develop tensile strength faster than sutured/stapled wounds<sup>1,3</sup>

## Omnistrip®

The wound closure strip made of non-woven fabric with excellent adhesion with excellent adhesion for surgical wounds/sutures lines and cuts.

Omnistrips® are flexible wound closure strips with rounded edges to prevent rolling or lifting prematurely. Omnistrips® are tan coloured making them cosmetically pleasing for many skin tones. The application is made easy with anchoring tabs and the acrylic adhesive reduces the possibility of allergic reactions.

## GluStitch® Twist Wound Closure

Using GluStitch® Twist improves cosmetic outcomes

GluStitch® Twist is a sterile, topical tissue adhesive.

GluStitch® Twist is provided in a single-use applicator packaged in a protective foil pouch. It remains liquid until it is applied to the skin and spread into a thin layer. GluStitch® Twist is intended for the topical closure of surgical skin incisions and trauma-induced lacerations in areas of low skin tension that are simple, thoroughly-cleansed, and have easily approximated skin edges.

- Topical tissue adhesive
- 6 x 0.5ml Sterile Ampoules
- Simple twist-off cap
- Sets in seconds
- Violet colour to improve visibility
- Great value

## DemeLON™ Nylon Sutures

DemeTech's Nylon Suture is a non-absorbable, sterile surgical suture composed of the long chain aliphatic polymers Nylon 6 and Nylon 6.6.

DemeTech's Nylon sutures are available in either black or blue. While DemeTech's Nylon is not absorbed, progressive hydrolysis may cause a gradual loss of up to 20% in its tensile strength each year. DemeTech's Nylon sutures are indicated for use in general soft tissue approximation and/or ligation, including use in ophthalmology.

### Features and Benefits

- Small USP sizes are designed specifically for microsurgical and ophthalmic procedures
- Made in U.S.A.

### Properties

## DemeSILK™ Silk Sutures

DemeTech's Silk suture is a non-absorbable, sterile, surgical suture composed of an organic protein called fibrin.

DemeTech's silk sutures are processed to remove the natural waxes and gums from its origin. As Silk is a natural fibre, it does elicit an acute inflammatory reaction, which is followed by gradual encapsulation of the suture by fibrous connective tissue (occurring usually in 14-21 days). DemeTech's silk sutures are indicated for use in general soft tissue approximation and/or ligation.

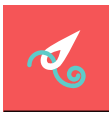

DeNon-absorbable

- Multifilament in nature
- Made in U.S.A.

### Properties

Tensile Strength	Material	Absorption Profile
Gradual loss of tensile strength over time	MULTIFILAMENT BLACK WHITE	Non Absorbable Suture
