

# Strong, reliable securement.

3M™ Durapore™ Surgical Tape features a silk-like, fabric backing with strong reliable adhesion:

- In a Clinical Evaluation on Durapore Tape, 46 out of 57 (81%) clinicians rated the tape as acceptable for tubing securement<sup>1</sup>
- Durapore Tape has been found to be an acceptable substitute for 3M™ Cloth Adhesive Tape for tube securement under moist conditions<sup>2\*</sup>

\*Tape adhesion to moist skin and moist tubing should continue to be monitored.

# 3M™ Durapore™ Surgical Tape

## Key Features

- High strength
- Convenient bi-directional tear
- Versatile
- Hypoallergenic and not made with natural rubber latex
- Water resistant

In a Clinical Evaluation on 3M™ Durapore™ Surgical Tape, clinicians rated it as acceptable or better than acceptable for: Initial adhesion to dry skin (73 out of 75); Stays in place if it gets damp from outside (55 out of 67); Good adhesion to tubing that becomes moist (54 out of 63).<sup>1</sup>
